RADOM GARRISON, DIAGRAMS (5 pp; Polish; Date of report; unknown; Date of distribution;

24 November 1952; 25X1A

25X1X

This is a 5-page document including 4 pages of diagrams.

The one-page report contains numbered comments supplementing legend of diagram No 4 on Radom Garrison: 1. Garrison hospital - exclusively under Soviet army command. 3. The hospital garden is jammed with equipment such as armored vehicles and gasoline. 4. Tent tops are visible. It is impossible to see anything additional since the view is completely cut off. 5. Many civilian families speaking Russian, who know the situation and the hospital staff. 6. Up to the present the space for the JP (Pancer Unit - ?) is empty except for a few ambulances. 7. Church and its grounds (same as 6) - completely neglected. 8. The garrison gardens are full of vegetables raised by the army. 10. Military barracks. More specific information cannot be given. However, many officers were seen in uniforms of various colors, such as khaki, black, and even colors used by the Polish prewar officers. Soviet style marching, i.e., long rows of soldiers carrying their arms before them, was also observed. These troops wore black uniforms. (Nos 2 and 9 omitted.)

Diagram No 1 consists of an airfield with the following legend:

A - Hangars; B - Motor fuel storage (gasoline); C - Restricted area with barbed wire fences and guard towers; D - Main Headquarters; E - Not given; F - Traffic control tower; G - Aircraft.

Diagram No 2 consists of three different views of an aircraft.

Diagram No 3 represents a truck parked near the barracks used to service the airfield. A machine gun with a very short barrel, resembling an automatic rifle is located on cab of the truck.

Diagram No 4 of Radom garrison contains the following legend: 1. Garrison hospital, 2. Cemetery, 3. Garden, 4a. Swimming pool, 4b-4c. Athletic field, 5. Living Quarters, 6. Space for pancer unit. 7. Parochial church, 8. Garrison gardens, 9. Woods, 10. Barracks of the unit: A, E, and F, Sleeping barracks, B. Officers' Barracks; C. and D. Command Headquarters, Canteen and Supply stores (including weapons).

Diagram No 5 shows the airfield near Schonnefeld and Leipzig.

Diagram No 6 shows shelters for airfield guards and maintenance crew. /Complete Translation/

FDD Abstract of

MISCELLANEOUS MILITARY INFORMATION ON POLAND (1 p; Polish; Date of Information: Unknown; Date of Distribution: 24 November 1952; [redacted])

25X1A

The following is a complete translation of the enclosed photostatic copy of a handwritten report;

25X1A [redacted] Military Information

1. Military airfield - A military airfield is located about 5 kilometers from Bodzentyn on the main road from Warsaw to Krakow. It lies between the towns of Stokowiec and Bodzentyn, and the Konskie worker's settlement. (Sketch is enclosed.) A traveller making his way on a dirt road from Bodzentyn to the main road saw this airfield. The location of the buildings is shown in the sketch. The aircraft were arranged in three rows. The aircraft types are as shown in the attached drawing. He claims that they were training ~~the~~ and fighter aircraft. He did not see any bombers.
2. The barracks near the ~~Konskie~~ Konskie settlement - Newly-built barracks capable of housing 2,000 men are located the other side of the main road between Warsaw and Krakow. The barracks building are two-storied and arranged in a quadrangle so that a person cannot see what is going on in the courtyard. Some sort of Soviet unit is stationed here. The cap bands and piping on their uniforms are red, with some sort of special braid near the epaulets. A motor vehicle park is located 50 to 100 meters from the barracks. He saw about 300 various type trucks in the park and a great many passenger autos. He does not know the designation of the unit.
3. An unidentified type uniform - Near the airfield he saw soldiers moving about in uniforms of a color between khaki and sand. The uniforms had two yellow epaulets narrower than the Soviet type. He does not know what type of unit it is. [redacted] note: Perhaps it is a unit of the special, newly-created Anti-Aircraft Defense Force (?).
4. Parked motor vehicles - Their appearance is as shown in drawing number 3. He got a close look at such a truck once because the driver had to stop along side the road for some repairs. It looked like a type of half-armored car. The car has 3 mm outer armor plate. The sides of the car are beechwood reenforced inside by steel. A machine gun with short barrel is above the driver's seat.
5. The Radom garrison - Some sort of unit in black uniforms (armored unit?) is stationed across from the hospital. He (the informant) was in Radom in 1948 looking for his family. He has relatives in Radom, a Doctor Skorka and Doctor Gaska illegible.
6. The Warsaw-Krakow road - This is an asphalt road for heavy traffic. It is supposed to be widened to the width of a super highway.

5 enclosures (sketches)
